HR TECH SOLUTIONS

DIGITAL WELLBEING

Slowing down the healthcare costs is the key driver for innovation in the health domain. The objective is to lower the demand for cure and long-time care and allowing the working professional and the elderly after retirement to maintain a good quality of life. The focus is to leverage sensor data to keep people healthy (through prevention and early detection) or help them cope with existing conditions. Both physical and mental wellbeing are considered. Solutions will need to have an emphasis on usability and user adoption while respecting data privacy.

HR TECH SOLUTIONS

L3W – Innovation Factory

A comprehensive platform combining AI and gamification techniques to increase employees' engagement, was still lacking. Live Well Work Well (L3W), an innovation activity supported by EIT Digital as part of its [Digital Wellbeing](#) focus area, is going to fill this void, providing an all-in-one solution to automatically track employees' fitness activities with wearables and Internet of Medical Things devices and stimulating them in performing personalized fitness circuits with their colleagues. The initiative is led by Italian company [Santer Reply](#), with [DFKI](#) and [OKKAM](#) as partners.

HR TECH SOLUTIONS

Qinematic software scans human posture, balance and movement. Clinics, gyms and workplaces use the 3D video, instant measurements and animated feedback to analyse, motivate and guide optimal function. Soma Analytics offers a smartphone application that measures, manages and reduces stress in the workplace. Employees benefit from improved mental resilience and productivity while employers reduce attrition and absenteeism.

HR TECH SOLUTIONS

Biosync Technology has developed a stress-management application for wellbeing at work or the treatment of chronic diseases. The solution combines biosensors, algorithm and an interactive user interface.

Machtfit provides preventive health courses for companies and employees via a web platform and an application. Employees choose from a variety of sport and relaxation classes, and HR can easily manage a program inside the company.
